About this pack: information for teachers

This pack contains the assessment materials for Unit 3: Communicating in the Digital World.

Within this pack, you will find:

- information for teachers on how to manage arrangements for assessment
- overview of candidate requirements
- research requirements
- assessment details
- the client brief
- a candidate mark record sheet
- a **candidate pack** which includes:
 - overview of requirements
 - research information
 - client brief
 - assessment information: a detailed breakdown of each task, the evidence and additional instruction, the assessment conditions (controls) under which the task is to be completed, timing and resources
 - appendix of skills
 - the mark scheme which must be used to assess candidate work
 - information for candidates, which tells candidates about things that they must and must not do when they are completing the assessment
 - a Candidate Declaration Form.

You must provide each candidate with a copy of the complete candidate assessment pack.

Managing the assessment

This is a centre-marked (internal) non-examination assessment. The following arrangements must be followed when managing and marking the assessment

Time

Candidates must be allowed **10 hours** to complete this assessment. Candidates should spend approximately:

- 2 hours completing Task 1
- 2 hours completing Task 2
- 6 hours completing Task 3.

The time suggested for each task takes account of the contribution of the task to the overall assessment requirements. There can be no changes to the total time available for this assessment. Centres can, however, amend the suggested time available for each task.

Research

Candidates can use research collected in non-supervised sessions.

Referencing

Candidates must reference any research brought into/developed during the NEA. Candidates must follow the guidelines on 'When to Reference a Source' found in Appendix 1 and 'How to Reference a Source' found in Appendix 2 of the document named 'Conducting Non-examination Assessments in National 14-16 Qualifications – Guide for Teachers'.

Assessment conditions

There are three levels of Assessment conditions: high, medium and low. The conditions relevant for this unit are stated below.

Level	Assessment conditions
High	Candidates complete work under formal supervision¹ - in a classroom, (e.g. in a classroom with teacher supervision) following these rules: • No communication with peers is allowed (including unrelated topics) • No assistance may be given by the teacher beyond reading the instructions • Candidates must work independently, and all work must be their own. • Candidates' work must remain within the centre at all times and stored securely between timetabled sessions • Wall displays or materials that could advantage candidates must not be visible • In line with JCQ regulations for non-examination assessments, the 'Warning to Candidates' and 'Unauthorised Items Poster' must be displayed.

Resources

There are three levels of Assessment conditions: high, medium and low. The conditions relevant for this unit are stated below.

Level	Resources
Specified	• Candidates may access only the specific resources stated in the Research Information and/or Assessment Information. This may include centre-provided resources or research candidates collected during the research phase • Internet access (and other resources) may be allowed for research if specified by the Assessment Information; teachers must monitor this • Candidates must not provide resources unless explicitly stated in the Assessment Information • Candidates must follow the 'When to Reference a Source' found in Appendix 1 and 'How to Reference a Source' found in Appendix 2 when using resources found in 'Conducting Non-examination Assessments in National 14-16 Qualifications – Guide for Candidates'

¹ There are no set requirements regarding the number of teachers/assessors required to be present during an assessment. However, the ratio must be sufficient to ensure appropriate supervision of candidates throughout. If only one teacher/assessor is present, they must be able to request assistance without needing to leave the assessment room. Under no circumstances should candidates be left unsupervised or unattended at any time.

Candidates must have access to the candidate assessment pack and any necessary resources, as specified in the detailed task tables within the candidate pack.

Supervision

Candidates must be supervised by an assessor whilst completing the activities. Centres must have in place systems to ensure candidates cannot access evidence they have been developing outside of supervised activities.

Authentication

Supervision must be in place to ensure the authenticity of evidence produced for summative assessment.

You should not provide input or guidance to candidates during the assessment time. This includes providing formative feedback on the evidence being produced. You can provide guidance on the requirements of the task and remind candidates of the mark bands and how they can be interpreted.

Candidates can review and redraft evidence independently within the time controls for the assessment.

Candidates must sign the declaration to confirm that all evidence submitted for moderation is their own work and that any sources used have been acknowledged.

Assessors must sign the declaration to confirm that evidence submitted for moderation was completed under the controlled conditions set out in this assessment.

Candidate evidence

The acceptable formats for evidence of each of the tasks is summarised in the task tables. Any modified assessment must enable the candidate to generate the evidence required in this table.

Marking the assessment

The marking scheme for this assessment are included in the candidate pack.

All marking of evidence must be made against the marking scheme provided. Evidence marked must comply with any requirements set out in the assessment pack.

Written evidence must be annotated to show how it relates to the mark band requirements.

Marking should only be undertaken by a designated assessor. An assessor should have appropriate expertise in the subject and level for a specified unit. The assessor is responsible for ensuring that:

- assessment is conducted under the controls specified in the task table
- they are clear about the requirements of the assessment and marking scheme prior to commencing assessment
- evidence presented for assessment is valid, authentic, reliable and credible
- assessment decisions are accurately recorded
- evidence is appropriately annotated
- judgements are only made against the mark band statements.

A mark record sheet must be completed for each candidate.

Further information

You should refer the WJEC Applied Qualifications (including Alternative Academic Qualifications): Assessment Guide / JCQ Instructions for conducting non-examination assessment for further information on managing assessment within our GCSE/Applied Qualifications.

You should also refer to WJEC Conducting Non-examination Assessments in National 14-16 Qualifications – Guide for Teachers.

This pack is the live assessment. It must not be used for practice purposes.

Assessment

Overview of Candidate requirements

Candidates are required to:

Outside non-examination assessment time:

- collect digital assets and copy (text).

In Task 1, candidates are required to:

- recommend the most relevant social media platform to meet the needs of a specific target audience
- explain how the characteristics and features of the social media platform could impact on user engagement
- explain how forms of digital marketing, placement and targeting strategies could help the organisation achieve its aims
- explain how the benefits, opportunities and risks of the digital marketing campaign could influence an organisation in achieving its aims.

In Task 2, candidates are required to use research and findings from Task 1 to inform a digital marketing strategy. Candidates are required to use digital assets and copy collected to create a digital marketing video.

In Task 3, candidates apply suitable software skills to create and export a coherent digital marketing video.

Research requirements

To prepare for the non-examination assessment, candidates should:

- conduct research to gather information and existing digital assets
- required digital assets, including:
 - copy (text)
 - graphics
 - photos
 - moving images.

Research and collecting digital assets does not form part of the non-examination assessment time or assessed tasks, but will be needed to complete assessed tasks. The collection of research and digital assets does not need to take place all at once – candidates are permitted to gather research information and add to their digital assets at any point during the assessment window. This research **must** be submitted alongside the responses to the tasks, in a folder called **Research**.

Assessment details

Assessment may be undertaken at any time during the qualification. However, centres should ensure that assessment is completed only when candidates have undertaken the necessary teaching and learning and developed the required skills and knowledge.

The total mark for this unit is 60.

Guidance for Assessment

Each task has a separate assessment grid.

The appropriate band should be established by determining which performance descriptor best reflects the candidate's performance.

The appropriate mark should then be established by determining the extent to which the candidate has met the criteria within the relevant band – completely met (upper part of band), mostly met (middle of band), partially met (lower part of band).

Client brief: Digital marketing campaign for local charities.

Visionary Creation Studio is an advertising company specialising in digital marketing. The use of digital marketing campaigns, particularly through video content, has grown significantly across various social media platforms.

Visionary Creation Studio has been approached by a group of small charities, working together to enhance their individual fundraising efforts. The group of charities would like video content developed as part of a digital marketing campaign, tailored to each individual charity and the demographic factors of its chosen social media platforms. The individual charities have decided they would like the video content to meet the needs of a target audience with an age range of 18-24. They have stated that the video is to last no longer than two minutes.

Digital marketing campaign requirements

Each individual charity would like a digital marketing video, that will be posted on a social media platform, to include information about the individual charity, highlighting:

- the charity's aims
- how donations make an impact
- how to get involved in supporting the charity.

Visionary Creation Studio would like you to create a digital marketing video about **one** small charity.

Please note the following:

- *you can choose a small charity on which you would like to base your digital marketing campaign. You may want to use an existing small charity or invent a fictional small charity*
- *information about the charity does not form part of the assessment, you will, however, gain marks for ensuring coherence between digital media assets and copy, you should consider this when using your time to develop tasks*
- *in the non-examination assessment, when 'the organisation' is referred to, it is the chosen charity, not Visionary Creation Studio.*

Candidate Mark Record Sheet

GCSE Digital Technology

Candidate Assessment Pack

Unit 3: Communicating in the Digital World

3490U3

About this pack: information and instructions for candidates

This candidate assessment pack is for candidates completing Unit 3 – Communicating in the Digital World.

Within this pack, you will find:

- overview of candidate requirements
- research information
- the client brief
- assessment information: a detailed breakdown of each task, the evidence and additional instruction, the conditions (controls) under which the task is to be completed, timing and resources
- appendix of skills that should be used when developing your video
- information for candidates, which tells you about things that you must and must not do when you are completing the assessment
- the mark scheme which will be used to assess your work
- a Candidate Declaration Form.

You will have 10 hours in total to complete this assessment. You should spend approximately:

- 2 hours completing Task 1
- 2 hours completing Task 2
- 6 hours completing Task 3.

Supervision

You will be supervised throughout the assessment.

You do not need to be supervised when collecting digital assets. This collection of digital assets does not form part of your non-examination assessment time.

Monitoring

- Teachers may provide guidance and support to you to ensure that you have a clear understanding of the requirements, including the brief and the assessment grid.
- Once the creating and developing work is underway, feedback must be limited to general advice on what needs to be improved. Teachers must not provide specific guidance on how to achieve these improvements.
- Teachers must see your ideas in progress at different stages during the process to be able to authenticate the work as your own and complete the necessary authentication documentation.

Resources

You are permitted to collect digital assets to use within your digital products. These are collected outside your non-examination assessment time.

Your teacher is allowed to help you to understand the assessment requirements, client brief and the tasks, but there are rules about the kind of help and how much they can give you. You should speak to your teacher if you have any questions about what you are and are not allowed to do as you are completing the tasks, as they will know how much help they are allowed to give you.

Overview of candidate requirements

You are required to:

Outside non-examination assessment time:

- collect digital assets and copy (text).

In Task 1, you are required to:

- recommend the most relevant social media platform to meet the needs of a specific target audience
- explain how the characteristics and features of the social media platform could impact on user engagement
- explain how forms of digital marketing, placement and targeting strategies could help the organisation achieve its aims
- explain how the benefits, opportunities and risks of the digital marketing campaign could influence an organisation in achieving its aims.

In Task 2, you are required to use your research and findings from Task 1 to inform a digital marketing strategy. You are required to collect digital assets and copy collected to create a digital marketing video.

In Task 3, you are required to use suitable software skills to create and export a coherent digital marketing campaign video.

Research information

To prepare for the non-examination assessment, you should:

- conduct research to gather information and existing digital media assets
- required digital assets, including:
 - copy (text)
 - graphics
 - photos
 - moving images.

Research and collecting digital assets does not form part of your non-examination assessment time or assessed tasks, but will be needed to complete your assessed tasks. The collection of research and digital assets does not need to take place all at once - you are permitted to gather research information and add to their digital assets at any point during the assessment window. This research **must** be submitted alongside your responses to the tasks, in a folder called **Research**.

Client brief: Digital marketing campaign for local charities.

Visionary Creation Studio is an advertising company specialising in digital marketing. The use of digital marketing campaigns, particularly through video content, has grown significantly across various social media platforms.

Visionary Creation Studio has been approached by a group of small charities, working together to enhance their individual fundraising efforts. The group of charities would like video content developed as part of a digital marketing campaign, tailored to each individual charity and the demographic factors of its chosen social media platforms. The individual charities have decided they would like the video content to meet the needs of a target audience with an age range of 18-24. They have stated that the video is to last no longer than two minutes.

Digital marketing campaign requirements

Each individual charity would like a digital marketing video, that will be posted on a social media platform, to include information about the individual charity, highlighting:

- the charity's aims
- how donations make an impact
- how to get involved in supporting the charity.

Visionary Creation Studio would like you to create a digital marketing video about **one** small charity.

Please note the following:

- *candidates can choose a small charity on which they would like to base their digital marketing campaign. Candidates may want to use an existing small charity or invent a fictional small charity*
- *information about the charity does not form part of the assessment, candidates will, however, gain marks for ensuring coherence between digital media assets and copy, they should consider this when using their time to develop tasks.*
- *in the non-examination assessment, when 'the organisation' is referred to, it is the chosen charity, not Visionary Creation Studio.*

Assessment information

Tasks

Task 1. Digital marketing campaign research investigation

Using your research, complete the following tasks to create a digital marketing campaign research document.

	Task	Evidence and additional instructions	Controls
a	Recommend the most relevant social media platform, based on the demographic factors to meet the needs of the target audience specified in the client brief. [5 marks]	Written evidence.	Assessment conditions: High Resources: Specified
b	Explain how the characteristics and features of the chosen social media platform could impact the user engagement. [5 marks]	Written evidence.	
c	Explain how a digital marketing strategy could help the organisation achieve its aims. In your response you should refer to the following: • forms of digital marketing • placement strategies • targeting strategies. [5 marks]	Written evidence.	

d	Explain how the benefits, opportunities and risks of a digital marketing campaign posted on social media could influence the organisation in achieving its aims. [5 marks]	Written evidence.	
You should spend approximately 2 hours completing this task. Resources permitted: Research notes from research period only (must be submitted)			

Task 2. Developing and implementing a digital marketing strategy

Use your research data and identified opportunities to complete the following task for your digital media marketing strategy:

	Task	Evidence and additional instructions	Controls
a	Develop specific and measurable success criteria for the digital marketing campaign. Your success criteria should refer to the following aspects from Task 1 and consider user engagement: • demographic factors of the target audience • characteristics of the social media platform • features of the social media platform • forms of digital marketing • placement strategies • targeting strategies. [5 marks]	Written evidence Please note the marketing campaign video is to be a maximum of 2 minutes in length.	Assessment conditions: High Resources: Specified
b	Produce an annotated initial design using a standard design method for the digital marketing video. This initial design should reflect your success criteria and ensure coherence between all created or manipulated digital assets and copy (text). [5 marks]	Annotated initial design can be a drawing or produced using appropriate software e.g. Word Processing software	
You should spend approximately 2 hours completing this task. Resources permitted: Research notes from research period only (must be submitted)			

Task 3. Creating the digital marketing campaign video

Using appropriate software skills, create or manipulate digital assets to produce an exported video for your social media marketing campaign.

	Task	Evidence and additional instructions	Controls
a	Use suitable software skills (categorised as basic, medium and complex, as listed in Appendix A) to create or manipulate suitable digital assets for the digital marketing video using: • copy (text) • photos • graphics • moving images. Use your success criteria and designs from Task 2. [20 marks]	Screen shot with concise written annotation or oral comments in a screen recording with concise explanations (written or oral) where digital asset creation or manipulation skills are not obvious to the assessor. Written document for screen shot evidence. Video file in an appropriate format. Please note you should ensure coherence between all created and manipulated digital assets, which will be assessed in Task 3 (b) ii.	Assessment conditions: High Resources: Specified
b	(i) Use suitable software skills to export the digital marketing video, including: • video formatting • resolution settings • audio settings • compression techniques. [5 marks] (ii) Final exported digital marketing video demonstrates coherence between all created or manipulated digital assets. [5 marks]	Screen shot with concise written annotation or oral comments in a screen recording with concise explanations (written or oral) where video editing skills are not obvious to the assessor. Written document for screen shot evidence. Video file in an appropriate video format. Additional evidence is not required for Task 3 b(ii).	
You should spend approximately 6 hours completing this task. Resources permitted: Digital assets sources in research time			

End of tasks

Appendix A

Skills when creating and manipulating digital assets, (categorised as basic *, medium ** and complex ***)

Copy (Text)	Photo editing	Graphics:	Video (Moving images):
font colour: select a colour that contrasts well with the background for better visibility *	brightness: increase or decrease the lightness of the photo *	fill: apply solid colours, gradients, or patterns to shapes and areas *	cropping: adjust the frame to focus on a specific area or change the aspect ratio *
font size: adjust the size of the text to make it more readable or to fit the design *	contrast: adjust the difference between the light and dark areas *	lines: create and adjust lines, including their thickness, style (solid, dashed), and colour *	trimming: cut out unwanted sections from the beginning, middle, or end of the video *
font style: choose from various fonts for example serif, sans-serif, script, and decorative *	crop: trim the edges to focus on a specific area or to change the aspect ratio *	shapes: draw and manipulate basic shapes like rectangles, circles, and polygons *	resizing: change the dimensions of the video to fit different formats or resolutions *
text alignment: align text to the left, centre, or right, or justify *	flip: mirror the photo horizontally or vertically *	stroke: add and customise the outline of shapes, including colour, width, and style *	rotation: rotate the video to the desired orientation *
text position: place text at various positions on the screen (top, bottom, centre, etc.) *	resize: adjust the dimensions of the photo to fit different formats or resolutions *	text: add and style text with various fonts, sizes, colours, and effects *	Zoom in/out or pan to videos, images or text *
text animation: add animations for example fade-in, slide, bounce, or typewriter effects **	rotate: turn the photo to the desired orientation *	blending modes: combine layers in several ways to achieve different visual effects **	aspect ratio: adjust the width-to-height ratio to fit different screens (16:9, 4:3, etc.) **
text background: add a background colour or shape behind the text for better readability **	saturation: enhance or reduce the intensity of colours *	effects: apply special effects like shadows, glows, and reflections **	audio: add, remove, or adjust audio tracks, including background music and sound effects **
text duration: set how long the text appears on the screen **	sharpness: enhance the clarity and detail *	filters: apply effects like blur, sharpen, and artistic filters to elements **	colour correction: adjust brightness, contrast, saturation, and hue **

text effects: apply effects for example glow, blur, or emboss to enhance the text **	borders/frames: add decorative edges around the photo **	gradients: create smooth transitions between colours for backgrounds or shapes **	filters: apply colour adjustments and effects to change the look and feel of the video **
text opacity: adjust the transparency of the text to blend it with the video **	blur: soften the focus for a dreamy effect or to reduce noise **	layers: organise elements on different layers for easier editing and composition **	speed adjustment: speed up or slow down the video for effect **
text outline: add an outline to the text for better contrast **	exposure: adjust the amount of light in the photo **	opacity: adjust the transparency of elements to create layering effects **	stabilisation: reduce camera shake for smoother footage **
text shadow: apply shadows **	filters: apply preset colour adjustments for different moods or styles **	patterns: use repeating designs to fill areas or create textures **	transitions: add effects between clips, such as fades, wipes, or dissolves **
text rotation: rotate the text to fit the design or add a dynamic effect **	hue: change the overall colour tone of the photo **	alignment: align elements relative to each other or to the canvas ***	voiceover: record and add narration to the video **
text spacing: adjust letter spacing and line height for better readability **	text: add captions, titles, or watermarks **	clipping paths: use paths to define areas where elements are visible ***	watermark: add a logo or text as a watermark **
text transitions: use transitions to smoothly introduce or remove text from the screen **	vignette: darken or lighten the edges of the photo to draw attention to the centre **	grouping: combine multiple elements into a single group for easier manipulation ***	effects: apply visual effects like slow motion and reverse***
text 3d effects: apply 3d transformations to text for depth and perspective. **	cloning/healing: remove blemishes or unwanted elements by copying parts of the photo ***	guides and grids: use guides and grids to align and position elements precisely ***	layers: overlay multiple video clips, images, and text ***
kerning: adjust the spacing between characters to fine-tune the text's appearance ***	dodging & burning – lighten (dodge) or darken (burn) specific areas to enhance depth and contrast ***	masks: hide or reveal parts of layers to create complex compositions ***	opacity: adjust the transparency of video layers for blending ***
text gradient direction: control the direction of the gradient (e.g., horizontal, vertical, diagonal) ***	gradient mapping - apply custom gradients to create stylised colour effects **	transformations: scale, rotate, skew, and distort elements ***	keyframing: animate properties like position, scale, and opacity over time ***

text reflection: add a mirrored reflection of the text, which can be positioned below or beside it for a stylised effect ***	layers: combine multiple images or effects in a non-destructive way ***	colour adjustments: modify brightness, contrast, saturation, and hue of elements ***	masks: apply effects to specific areas of the video ***
text masking: use masks to reveal or hide parts of the text creatively. ***	masks: apply adjustments to specific areas without affecting the whole photo.***	export options: save graphics in various formats (png, jpeg, svg, etc.) for different uses ***	export options: save the video in various formats (mp4, avi, mov, etc.) and resolutions ***
text path animation: animate text along a custom path for dynamic movement. ***	noise reduction: minimise graininess or digital noise ***	3d effects: apply 3d transformations and effects to create depth and perspective. ***	green screen keying: remove green screen backgrounds and replace them with other footage.***
text layering: layer multiple text elements to create complex designs. ***	white balance: correct the colour balance to make whites appear neutral ***	custom brushes: create and use custom brushes for unique textures and effects. ***	colour grading: apply advanced colour adjustments to achieve a specific look or mood. ***
text blending modes: use blending modes to combine text with video layers in unique ways. ***	selective colour adjustment: adjust the colours of specific areas without affecting the entire photo.***		Zoom in/out using key frames ***
	colour grading: apply advanced colour adjustments to achieve a specific look or mood.***		
	histogram adjustment: use histograms to fine-tune exposure and contrast.***		

Information for candidates

The following information has been taken from the [JCQ Information for candidates – non-examination assessments](#) and the [JCQ Artificial Intelligence \(AI\) Use in Assessments: Protecting the Integrity of Qualifications](#). This tells you about things that you **must** and **must not** do when you are completing your assessment. If there is anything that you do not understand, you **must** ask your teacher.

Preparing your work

- When you submit your work and sign your candidate declaration form, you need to ensure that your final product reflects your own independent work and isn't copied or paraphrased from another source such as an AI tool.
- If you receive help and guidance from someone other than your teacher, you **must** tell your teacher who will then record the nature of the assistance given to you.
- If you worked as part of a group on a task, you **must** each write up your own account of the assignment. Even if the data you have is the same, you **must** describe in your own words how that data was obtained, and you **must** independently draw your own conclusions from the data.
- Take care of your work and keep it safe. **Do not** leave it lying around where your other candidates can find it or share it with anyone, including posting it on social media. You **must** always keep your work secure and confidential whilst you are preparing it; **do not** share it with other candidates. If it is stored on the computer network, keep your password secure. Collect all copies from the printer and destroy those you do not need.
- **Do not** be tempted to use pre-prepared online solutions (such as those produced by AI tools and chatbots) – this is cheating. Electronic tools used by WJEC can detect this sort of copying.
- You **must not** write inappropriate, offensive or obscene material.

Plagiarism

Plagiarism involves taking someone else's words, thoughts or ideas and trying to pass them off as your own. **It is a form of cheating which is taken very seriously.** Don't think you won't be caught; there are many ways to detect plagiarism:

- Markers can spot changes in the style of writing and use of language.
- Markers are highly experienced subject specialists – they may have read the source you are using, or even marked the work you have copied from!
- Internet search engines and specialised computer software can be used to match phrases or pieces of text with original sources and to detect changes in the grammar and style of writing or punctuation.

Penalties for breaking the regulations

If it is discovered that you have broken the regulations, one of the following penalties will be applied:

- the piece of work will be awarded zero marks
- you will be disqualified from that unit for the assessment series in question
- you will be disqualified from the whole subject for that assessment series
- you will be disqualified from all subjects and barred from entering again for a period of time.

WJEC will decide which penalty is appropriate.

Remember – it's your qualification so it needs to be your own work.

Mark scheme

The following mark scheme will be used to assess your work.

0 marks will be awarded if there is no evidence or submitted work is not worthy of credit.

Task 1(a)	
Recommend the most relevant social media platform, based on the demographic factors to meet the needs of the target audience specified in the client brief.	
Band	AO3: Apply knowledge, skills and understanding to identify audience needs and plan digital products and communications that meet these needs.
3	Award 5 marks - comprehensive application of knowledge and understanding of demographic factors to meet the needs of the specified target audience - the recommendation clearly links a wide range of suitable demographic factors to the most relevant social media platform effectively addressing the target audience needs
2	Award 3-4 marks - adequate application of knowledge and understanding of demographic factors to meet the needs of the specified target audience - the recommendation makes some relevant links between suitable demographic factors and the chosen social media platform, with partial consideration of how it addresses the target audience's needs
1	Award 1-2 marks - basic application of knowledge and understanding of demographic factors with limited consideration of the needs of the specified target audience - the recommendation includes minimal or unclear links between demographic factors and the social media platform, with minimal reference to how the target audience needs are addressed.
0	Award 0 marks No response attempted or nothing worthy of credit.

Task 1(b)

Explain how the characteristics **and** features of the chosen social media platform could impact on the user engagement.

Band	AO2: Apply knowledge and understanding of digital technology systems in a range of contexts.
3	Award 5 marks - comprehensive application of knowledge and understanding of a wide range of relevant characteristics and features of the chosen social media platform and how these could impact on user engagement - the explanation clearly links a wide range of relevant platform characteristics and features and their potential impact on user engagement
2	Award 3-4 marks - adequate application of knowledge and understanding of some relevant characteristics and features of the chosen social media platform and how these could impact on user engagement - the explanation makes some relevant links between some relevant platform characteristics and features and their potential impact on user engagement
1	Award 1-2 marks - basic application of knowledge and understanding of minimal characteristics and/or features of the chosen social media platform and limited consideration of how these could impact on user engagement of the digital marketing campaign - the explanation makes minimal or unclear links between minimal platform characteristics and/or features and their potential impact on user engagement.
0	Award 0 marks No response attempted or nothing worthy of credit.

Task 1(c)

Explain how a digital marketing strategy could help the organisation achieve its aims.

In your response you should refer to the following:

- forms of digital marketing
- placement strategies
- targeting strategies.

Band	AO2: Apply knowledge and understanding of digital technology systems in a range of contexts.
3	Award 5 marks • comprehensive application of knowledge and understanding of how a digital marketing strategy could help the organisation achieve its aims • the explanation clearly links a wide range of relevant forms of digital marketing, placement strategies and targeting strategies to how it could help the organisation achieve its aims
2	Award 3-4 marks • adequate application of knowledge and understanding of how a digital marketing strategy could help the organisation achieve its aims • the explanation makes some relevant links using some relevant forms of digital marketing, placement strategies and targeting strategies to how it could help the organisation achieve its aims.
1	Award 1-2 marks • basic application of knowledge and understanding of how a digital marketing strategy could help the organisation achieve its aims • the explanation makes some minimal or unclear links using minimal relevant forms of digital marketing, placement strategies and targeting strategies to how it could help the organisation achieve its aims.
0	Award 0 marks No response attempted or nothing worthy of credit.

Task 1(d)

Explain how the benefits, opportunities and risks of a digital marketing campaign posted on social media could influence the organisation in achieving its aims.

Band	AO2: Apply knowledge and understanding of digital technology systems in a range of contexts.
3	Award 5 marks - comprehensive application of knowledge and understanding of how the benefits, opportunities and risks of a digital marketing campaign posted on social media could influence the organisation in achieving its aims - the explanation clearly links how the benefits, opportunities and risks of a digital marketing campaign posted on social media could influence the organisation in achieving its aims
2	Award 3-4 marks - adequate application of knowledge and understanding of how the benefits, opportunities and risks of a digital marketing campaign posted on social media could influence the organisation in achieving its aims - the explanation links how the benefits, opportunities and risks of a digital marketing campaign posted on social media could partially influence the organisation in achieving its aims
1	Award 1-2 marks - basic application of knowledge and understanding of how the benefits, opportunities and risks of a digital marketing campaign posted on social media could influence the organisation in achieving its aims - the explanation includes minimal or unclear links between how the benefits, opportunities and risks of a digital marketing campaign posted on social media could influence the organisation, with minimal links to the organisation achieving its aims.
0	Award 0 marks No response attempted or nothing worthy of credit.

Task 2(a)

Develop specific and measurable success criteria for the digital marketing campaign.

Your success criteria should refer to the following aspects from Task 1 and consider user engagement:

- demographic factors of the target audience
- characteristics of the social media platform
- features of the social media platform
- forms of digital marketing
- placement strategies
- targeting strategies.

Band	AO3: Apply knowledge, skills and understanding to identify audience needs and plan digital products and communications that meet these needs.
3	Award 5 marks • comprehensive application of research data and identified opportunities to develop specific and measurable success criteria for the digital marketing campaign • the response clearly links research data and identified opportunities to all aspects from Task 1 and their potential impact on user engagement
2	Award 3-4 marks • adequate application of research data and identified opportunities to develop specific and measurable success criteria for the digital marketing campaign • the response makes some links between research data and identified opportunities to some aspects from Task 1 and their potential impact on user engagement
1	Award 1-2 marks • basic application of research data and identified opportunities to develop specific and/or measurable success criteria for the digital marketing campaign • the response makes minimal links between research data and/or identified opportunities to minimal aspects from Task 1 and their potential impact on user engagement.
0	Award 0 marks No response attempted or nothing worthy of credit.

Task 2(b)

Produce an annotated initial design using a standard design method for the digital marketing video.

This initial design should reflect your success criteria and ensure coherence between all created or manipulated digital assets and copy (text).

Band	AO3: Apply knowledge, skills and understanding to identify audience needs and plan digital products and communications that meet these needs.
3	Award 5 marks - comprehensive application of standard design methods to create an initial design for the digital marketing video - the initial design is detailed, clearly reflects success criteria and ensures coherence between digital media assets and copy (text)
2	Award 3-4 marks - adequate application of standard design methods to create an initial design for the digital marketing video - the initial design has some detail, reflect some success criteria and ensure some coherence between digital media assets and copy (text)
1	Award 1-2 marks - basic application of standard design methods to create an initial design for the digital marketing video - the initial design has minimal detail, reflects minimal success criteria and/or ensure minimal coherence between digital media assets and copy (text).
0	Award 0 marks No response attempted or nothing worthy of credit.

Task 3(a)

Use suitable software skills (categorised as basic, medium and complex, as listed in Appendix A) to create or manipulate suitable digital assets for the digital marketing video) using:

- copy (text)
- photos
- graphics
- moving images.

Use your success criteria and designs from Task 2

Band	AO4: Develop, test and evaluate digital products that meet the needs of specified audiences.
5	Award 17-20 marks • the video demonstrates excellent development of software skills to create or manipulate digital assets • the video includes highly suitable and highly accurate creation or manipulation of copy (text), photos, graphics, and moving images using at least five complex, five medium, and five basic skills • the created or manipulated digital assets are fully aligned with the formulated digital marketing video, demonstrating a high level of creativity, technical proficiency, and coherence
4	Award 13-16 marks • the video demonstrates very good development of software skills to create or manipulate digital assets • the video includes mostly suitable and mostly accurate creation or manipulation of copy (text), photos, graphics, and moving images using at least four complex, four medium, and four basic skills • the created or manipulated digital assets are clearly-aligned with the formulated digital marketing video, demonstrating creativity, technical proficiency, and coherence
3	Award 9-12 marks • the video demonstrates adequate development of software skills to create or manipulate digital assets • the video includes somewhat suitable and somewhat accurate creation or manipulation of copy (text), photos, graphics, and moving images using at least three complex, three medium, and three basic skills • the created or manipulated digital assets are generally aligned with the formulated digital marketing video, demonstrating some technical proficiency and coherence

2	Award 5-8 marks - the video demonstrates basic development of software skills to create or manipulate digital assets - the video includes the creation or manipulation of copy (text), photos, graphics, and moving images using at least six complex, medium or basic skills, there is a lack of suitability or a lack of accuracy - the created or manipulated digital assets are partially aligned with the formulated digital marketing video, demonstrating limited technical proficiency and coherence
1	Award 1-4 marks - the video demonstrates limited development of software skills to create or manipulate digital assets - the video includes minimal creation or manipulation of copy (text), photos, graphics, and moving images using at least three basic, medium, or complex skills, there is a lack of suitability and a lack of accuracy - the created or manipulated digital assets are minimally aligned with the formulated digital marketing video, demonstrating minimal technical proficiency and coherence.
0	Award 0 marks No response attempted or nothing worthy of credit.

Task 3(b)(i)

Use suitable software skills to export the digital marketing video, including:

- video formatting
- resolution settings
- audio settings
- compression techniques.

Band	AO4: Develop, test and evaluate digital products that meet the needs of specified audiences.
3	Award 5 marks • the exported product demonstrates comprehensive development of software skills to export the digital marketing video, including suitable development of all of the following: • video formatting • resolution settings • audio settings • compression techniques
2	Award 3-4 marks • the exported product demonstrates adequate development of software skills to export the digital marketing video, including suitable development of some of the following: • video formatting • resolution settings • audio settings • compression techniques
1	Award 1-2 marks • the exported product demonstrates basic development of software skills to export the digital marketing video, including minimal development of at least one the following: • video formatting • resolution settings • audio settings • compression techniques
0	Award 0 marks No response attempted or nothing worthy of credit.

Task 3(b)(ii)

Final exported digital marketing video demonstrates coherence between all created or manipulated digital assets.

Band	AO4: Develop, test and evaluate digital products that meet the needs of specified audiences.
3	Award 5 marks the exported product demonstrates a high level of coherence between all created or manipulated digital assets, ensuring a seamless and professional final product
2	Award 3-4 marks the exported product demonstrates an adequate level of coherence between most created or manipulated digital assets, providing a satisfactory final product
1	Award 1-2 marks the exported product demonstrates a basic level of coherence between some created or manipulated digital assets, providing a basic final product.
0	Award 0 marks No response attempted or nothing worthy of credit.

Question	Topic and Section						Total Marks	AO2	AO3	AO4
	3.1			3.2						
	3.1.1	3.1.2	3.1.3	3.2.1	3.2.2	3.2.3				
1 (a)	✓						5	0	5	0
