

GCSE – NEW

3490U20-1

**Release date: 1 SEPTEMBER 2026
For submission SUMMER 2027**

DIGITAL TECHNOLOGY

Unit 2: Digital Practices

**AVAILABLE ONLY TO CANDIDATES ENTERING THE WJEC
QUALIFICATION APPROVED BY QUALIFICATIONS WALES AND NOT
AVAILABLE TO CENTRES IN ENGLAND.**

**THIS BRIEF SHOULD BE READ IN CONJUNCTION WITH
INFORMATION CONTAINED WITHIN THE GCSE DIGITAL
TECHNOLOGY NON-EXAMINATION ASSESSMENT HANDBOOK.**

Information for candidates

When you submit your work you must sign the candidate declaration form, you are signing to say that the work has been produced in line with the controls and guidance set out for this assessment.

Instructions to candidates

You must complete all work **independently**; collaboration is not permitted.

You must ensure all work is **your own and produced without unauthorised assistance**.

You must **not plagiarise**, including copying from other students, online sources or pre-prepared materials.

You must follow **controlled (high control) conditions**, including working under supervision and not communicating with other candidates during assessment sessions.

You must follow all instructions in the **NEA handbook and assessment brief** at all times.

You must only use **approved resources**, including your own research, and submit these with your work.

You must inform your teacher of any **assistance received from others**, so this can be recorded.

You must **clearly reference all sources**, including websites, images, digital assets and any ideas not originally your own.

You must follow rules on the **responsible use of Artificial Intelligence (AI)** and must not submit AI-generated content as your own work.

You must **acknowledge any use of AI**, where permitted, in line with assessment regulations.

You must keep your work **secure within the centre** and not remove or access it outside permitted conditions.

You must keep your work **confidential**, and must not share it or upload it online.

Client brief: Digital product development promoting swimming participation

Organisation Overview

Llynnoedd Cymru is an organisation committed to promoting physical activity, water safety, and community wellbeing across Wales. The organisation runs campaigns and training sessions designed to improve swimming participation and raise awareness of water safety.

Llynnoedd Cymru has identified that swimming participation levels, water safety confidence, access to lessons, and seasonal engagement vary significantly across Welsh local authorities. To respond to these challenges, the organisation is seeking a suite of digital products that will educate, inform, and engage communities across Wales.

Digital product development requirements:

Llynnoedd Cymru have conducted some initial research and have shared the dataset on swim participation, ability, knowledge of water safety and possible barriers. This data will need to be cleansed and organised to enable data analytics, which will guide decisions into audience needs, trends and preferences. The dataset file is called **LlynnoeddCymru_dataset.csv**.

They have also provided qualitative data in the form of a mood board to convey initial design options and to assist with implementing digital products which align with audience needs, trends and preferences. The file is called **Mood_Board.png**.

Llynnoedd Cymru is looking to enhance engagement through digital products which include:

- a multi-page website
- a digital product (either a computer game or a 2D animation) which aligns with the outcomes from data analytics.

They have provided a file which contains the required text for each page of the website and the pages that they require. The file is called **Webpage.txt**.

The project is to be completed over a two-month period¹. You are required to produce a time planning document to ensure the development process is completed on time. This will contain information on planned tasks, activities and milestones.

¹ Please note: The two-month period is provided to help contextualise the task. It is not a requirement that the non-examination assessment must be completed within a two-month window.
